LEGEND

COTTON

Textile fiber of vegetable origin, soft, comfortable and breathable.

POLYESTER

Textile fiber of synthetic origin resistant, durable and breathable.

ELASTANE

Textile fiber of synthetic origin that provides elasticity, flexibility and a better fit to the garments.

POLYAMIDE

Textile fiber of synthetic origin with very good resistance to traction, friction and washing.

ACRYLIC

Textile fiber of breathable synthetic origin, with good thermal retention and pleasant to the touch.

VISCOSE

Textile fiber made from vegetable cellulose, fresh, breathable and comfortable.

DENSITY

Indicates the value of the weight of the main fabric or the sum of several fabrics on a surface, expressed grams per square meter.

PCS X BOX

Value that indicates the number of units in a complete box in its original packaging.

ANTIBACTERIAL

Fabric with antibacterial finish that reduces the proliferation of bacteria and bad odors.

QUICK DRYING

Properties of a fabric that facilitate quick drying and perspiration thanks to its structure.

WATERPROOF

Properties of a tissue that block the passage of water and keep the body dry.

WATERPROOF GARMENT

Garment made of waterproof fabric and thermo-sealed seams that prevent water leaks.

WATER REPELLENT FABRIC

Properties of a fabric that make water slip on its surface and prevent it from penetrating it.

THERMAL

Fabric with high thermal retention that maintains body heat thanks to its interior structure.

EXTRA THERMIC

High thermal insulation fabric that keeps body warmth thanks its structure.

LOFT

Lightweight and padded fabric that provides thermal insulation thanks to its structure through channels.

14058-1

Certified garment as Personal Protective Equipment (PPE) according to Standard EN 14058 – Protective clothing against cold environments.

17353-B2

Certified garment as Personal Protective Equipment (PPE) according to Standard EN 17353 – Protective clothing – Enhanced visibility equipment for medium risk situations, type B2 for dark conditions.

17353-B3

Certified garment as Personal Protection Equipment (PPE) according to Standard EN 17353 – Protective clothing – Enhanced visibility equipment for medium risk situations, type B3 for dark conditions.

20471-1

Certified garment as Personal Protective Equipment (PPE) according to EN 20471 Standard – High visibility clothing, class 1.

PAPER

Processed sheet of vegetable origin, dried and hardened.

MICROFIBER

Fiber of synthetic origin lightweight, breathable, flexible, comfortable and versatile.

POLYPROPYLENE

Resistant, durable and recyclable material of synthetic origin.

PVC

Very versatile material of synthetic origin, good waterproof barrier.

PU

Material of synthetic origin, resistant, waterproof and breathable.

PCS X BAG

Value that indicates the number of units in a complete bag in its original packaging.

SOFTSHELL

Three-layer fabric, usually composed of two textile layers and an intermediate breathable membrane, with windproof effect and high thermal retention.

MONO-STRETCH

Elastic property of the fabric in the horizontal direction that favors mobility.

BI-STRETCH

Elastic property of the fabric, both horizontally and vertically, which promotes mobility.

WINDPROOF

Property of garments that retain body heat and slow the passage of wind.

HEAT-SEALED

Garments with seams covered with sheet that prevents water leaks and keeps the body dry in the rain.

SUBLIMATION

Garments suitable for marking by sublimation.

RIPSTOP

Fabric of quadrangular structure with thicker threads that increase its tensile strength and anti-tears.

PADDED

Padding added to the middle layer of the garment providing high thermal insulation.

20471-1 BICOLOR

Certified garment as Personal Protection Equipment (PPE) according to EN 20471 Standard – High visibility clothing, class 1.
